

1. Open malwarebytes. Once open click "Scan now" to begin.

2. Malwarbytes will update itself before beginning the scan.

3. After the scan finishes, if nothing is found click the "Finish" button. If it finds malware or unwanted programs, select all by clicking the box near the top left, and click the "Quarantine" button to finish. Malwarebytes will remove the unwanted programs and want the restart the computer. After the reboot, you are good to go!
